SUMMARY

Full-stack engineer building LLM-powered products end-to-end — agentic workflows (LangGraph), RAG pipelines (pgvector/HNSW), and LLM API integrations (Claude, OpenAI, Gemini) on production Java/Spring Boot and Node.js backends. Also shipped mobile (Flutter) and DevOps (Docker, CI/CD, AWS) work serving **10K+** users at **98%** reliability.

EDUCATION

National Institute of Technology, Hamirpur

Integrated B.Tech + M.Tech, Computer Science & Engineering, CGPA: UG 8.33/10 & PG 8.12/10

Hamirpur, HP, India

2022 - 2027

TECHNICAL SKILLS

AI / Agents: LLM APIs, LangChain, LangGraph, RAG, vectorDB

Languages: Java, TypeScript, JavaScript, Python, SQL

Full-Stack: Spring Boot, Node.js, React.js, Next.js, REST APIs, Microservices

Databases: PostgreSQL, Redis, MongoDB, MySQL, Firebase, Supabase

Cloud & DevOps: Docker, CI/CD, GitHub Actions, AWS EC2/S3, Linux

Practices: System Design, Distributed Systems, Agentic AI Workflows, Agile/Scrum, Git

EXPERIENCE

Full Stack Developer Intern

Oct 2025 – Mar 2026

Grocery On Wheels | Flutter, Node.js, TypeScript, PostgreSQL, CI/CD

India (Remote)

- Optimized application performance by achieving a consistent **60 FPS** frame rate and diminishing cold-start time by 80% through strategic lazy loading and Dart isolates.
- Integrated JWT-secured REST APIs with Hive offline caching, achieving **zero** data-loss incidents; managed App Store releases.
- Resolved intermittent payment gateway failures at checkout, eliminating recurring transaction timeout errors in production.

SDE Intern, Backend & Mobile

May 2025 – Aug 2025

SCM Software Labs | Java, Spring Boot, Flutter, Kafka, Map API

India (Remote)

- Architected Spring Boot REST APIs with JWT for a **3-role RBAC** system, serving **10K+** users with **zero** auth breaches.
- Owned the Flutter mobile client end to end, adding live GPS tracking that cut delivery delays by **15 min/order**.
- Replaced a polling-based system with event-driven real-time messaging, reaching **98%** delivery reliability under load.
- Engineered system enhancements via Hibernate optimizations and asynchronous processing, achieving an 80% reduction in server startup times and a 40% decrease in overall load.
- Containerized on AWS EC2 with Docker; automated CI/CD via GitHub Actions, trimming release cycle time by 60%

PROJECTS

HawkEye AI | React, Express.js, TypeScript, Node.js, WebSockets, OpenRouter AI

GitHub | Live Demo

- Engineered a real-time WebSocket pipeline processing **1K+** daily events, cutting threat identification time by **60%** over manual log triage; the system auto-diagnoses attack patterns and generates firewall rules at **98.4%** confidence.

GiftGraph | LangGraph, React, Express.js, Node.js, Firebase

GitHub | Live Demo

- Developed an agentic gift-recommendation concierge on LangGraph; a stateful graph parses intent, searches a catalog, validates budget via a conditional retry branch triggered on **36%** of requests, and drafts a personalized note end-to-end.

Money Manager | Java, Spring Boot, React, Spring Security, PostgreSQL

GitHub | Live Demo

- full-stack personal finance tracker using Spring Boot, React, and Spring Security with income/expense categorization and optimized PostgreSQL schemas to power real-time spending reports.

POSITIONS OF RESPONSIBILITY

Executive & Coordinator

Robotics Society (RoboSoc), NIT Hamirpur

- Planned hands-on robotics workshops for **500+** freshers; represented NIT Hamirpur at IIT Bombay Techfest Zonals, Lucknow.

ACHIEVEMENTS

- Runner-up among **100+** teams, Smart India Hackathon internal round; **350+** problems solved on LeetCode.
- 2100+** commits across production Flutter and AI integration projects; open-source contributor to GoFr (Go web framework) with merged pull requests.
