SUMMARY

AI-native full-stack engineer — building agentic (LangGraph) and RAG-based systems alongside production backends serving 10K+ users at 98% reliability. Stack: Go, Node.js, Spring Boot, Flutter, React.js, PostgreSQL, Redis, Docker, Claude/Gemini/OpenAI APIs.

EDUCATION

National Institute of Technology, Hamirpur

Integrated B.Tech + M.Tech, Computer Science & Engineering, CGPA: UG 8.3/10 & PG 8.12/10

Hamirpur, HP, India

2022 – 2027 (Expected)

TECHNICAL SKILLS

Languages: Java, C++, TypeScript, JavaScript, Dart, Python, SQL

AI / Agents: LLM, LangChain, LangGraph, RAG, LLM APIs (Claude, OpenAI, Gemini), vectorDB

Backend: Node.js, Express.js, Spring Boot, REST APIs, GraphQL, Microservices, WebSockets

Frontend & Mobile: Flutter (BLoC, Riverpod), React.js, Next.js 14, HTML, CSS

Databases: PostgreSQL, Redis, MongoDB, MySQL, pgvector (HNSW), BullMQ

Cloud & DevOps: Docker, CI/CD, GitHub Actions, AWS EC2/S3, Linux

Practices: System Design, Distributed Systems, Agentic AI Workflows, Agile/Scrum, Git

EXPERIENCE

Full Stack Developer Intern

Oct 2025 – Mar 2026

Grocery On Wheels | Flutter, Node.js, TypeScript, PostgreSQL, CICD, Devtools

India(Remote)

- Revamped inventory screens in Flutter, stabilizing frame rate from 45 to 60 FPS, and boosted cold startup by 80% via lazy loading, Dart isolates, and intelligent caching.
- Integrated REST APIs with JWT auth and Hive offline caching (zero data-loss incidents); managed the full App Store release cycle.
- Debugged intermittent payment gateway failures during checkout, resolving recurring transaction timeout errors in production.

SDE Intern, Backend & Mobile

May 2025 – Aug 2025

SCM Software Labs | Java, Spring-boot, Flutter, Kafka, Map API

India(Remote)

- Architected Spring Boot REST APIs with JWT + OAuth2 across a 3-role RBAC system, serving 10K+ users with zero reported auth breaches.
- Owned the end-to-end Flutter mobile client, integrating live GPS tracking that cut delivery delays by 15 min/order.
- Engineered event-driven real-time messaging achieving 98% delivery reliability, replacing a polling-based system prone to drop-offs under load.
- Reduced server load 40% and startup time 80% via async processing, batched API calls, and Hibernate optimizations; containerized on AWS EC2 with Docker and automated CI/CD via GitHub Actions, cutting release cycle time 60%.

PROJECTS

HawkEye AI | React, Express.js, TypeScript, Node.js, WebSockets, Openrouter AI

GitHub | Live Demo

- Real-time WebSocket pipeline processing 1K+ daily events, cutting threat identification time 60% over manual log triage; AI auto-diagnoses attack patterns and generates firewall rules at 98.4% confidence.

Shiksha Saathi | Flutter, Node.js, PostgreSQL, Redis, OpenRouter API

GitHub | Live Demo

- AI teacher assistant for rural India — generates Hindi lesson plans AI, auto-marks attendance synced via BullMQ queue, and serves 3 portals (teacher, student, parent) with Redis cache at sub-300ms API response.

GiftGraph | LangGraph, React, Express.js, Node.js, Firebase

GitHub | Live Demo

- Agentic gift-recommendation concierge built on LangGraph; a stateful graph parses intent, searches a catalog, validates budget with a conditional retry branch, and drafts a personalized note end-to-end.

POSITIONS OF RESPONSIBILITY

Executive & Coordinator

Robotics Society (RoboSoc), NIT Hamirpur

- Planned and conducted hands-on robotics workshops for 500+ freshers.
- Represented NIT Hamirpur in inter-college robotics competitions, qualifying at the IIT Bombay Techfest Zonals Lucknow .

ACHIEVEMENTS

- Runner-up among 100+ teams, Smart India Hackathon internal round.
- 2100+ commits across production Flutter and AI integration projects; solved 350+ problems on LeetCode.
- Open-source contributor to GoFr, a Go web framework, with merged pull requests improving core functionality.
